

# OBIWALE, EZRA TEMITOPE

SOFTWARE ENGINEER

## PROFILE

A solution-oriented developer with a passion for creating beautiful, scalable web applications, using appropriate software development principles.

He is always ready to learn any new skill required for the job and has a strong demonstrated ability to lead a tech team.

## PROFESSIONAL EXPERIENCE

### Lead Developer, Allpro Technologies

April 2018 - Present

Because I did such a great job as a senior software developer, I was made the Lead Developer, in charge of other developers, now more actively involved in planning.

- Build and maintain core infrastructure and APIs
- Responsible for building and maintaining a School Management System (Schoolable) used by over a thousand schools. (<http://myschoolable.com>)
- Responsible for deploying new applications and DevOps
- Responsible for reviewing others' codes and integrating into the existing product
- In charge of taking many projects from ideation to production
- Maintain in-house tools and plan SCRUM sprints.

### Senior Software Developer, Allpro Technologies

August 2017 - April 2018

- Build and maintain core infrastructure and APIs
- Responsible for building and maintaining a School Management System (Schoolable) used by over a thousand schools.
- Responsible for deploying new applications and DevOps
- Responsible for reviewing others' codes and integrating into the existing product
- In charge of taking many projects from the idea stage to production
